

Who is ATARC?

Advanced Technology Academic Research Center
designed by government • led by government • attended by government

Advanced Technology Academic Research Center

A non-profit that provides professional development and collaborative forums for Federal government, academia and industry to identify, discuss and resolve emerging technology challenges.

- 5 Mission Areas
- 17 Working Groups
- 40+ Industry Partners
- 100+ leaders and influencers

5 Mission Areas

17 Working Groups

Cyber Cooperative

The Cyber Cooperative Working Group will leverage, build, and unify the cyber defense capability and capacity of participating and partner organizations. It is in direct response and intended to support the Cybersecurity & Infrastructure Security Agency's (CISA) collaborative efforts. The Cyber Cooperative Working Group will provide a process and framework to directly engage and leverage their capability, capacity, and expertise to amplify their mission, reach, and desired outcomes in order to build, maintain, and sustain a unified cyber defense.
